

## REFERENCES

Through psychiatry's stigmatizing labels, false explanations, easy-seizure commitment laws and often brutal, depersonalizing "treatments" and deadening, mind-altering drugs, thousands needlessly fall into psychiatry's coercive system every day all over the world. It is a system which exemplifies human rights abuse.

*While CCHR does not provide medical or legal advice, it advocates thorough medical screening to check for any physical illness that can be medically treated.*

*Before you stop taking any psychiatric drug, you need to seek the advice and assistance of a competent non-psychiatric medical doctor.*

*Use the following references at your own discretion.*
